

RE-COLLAGEN®

It is a cutting-edge formulation with a perfect synergy of active ingredients that stimulate the endogenous synthesis of collagen, with the exclusive ABC COMPLEX® (Amino Boost Collagen Complex)

Glycine, Proline and Hydroxyproline are only of plant origin

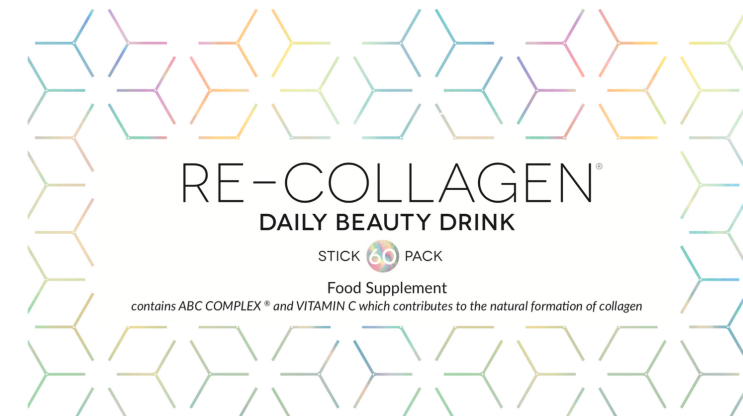

Pleasant taste

Triple action: active in the collagen synthesis, antioxidant action and skin hydration

A 60 days package, with lower daily cost

Handy stick pack, with an innovative and elegant image in line with the target

THE NEW GENERATION COLLAGEN

PromoPharma®

ABC COMPLEX® (AMINO BOOST COLLAGEN COMPLEX)

Glycine, Proline, and Hydroxyproline, are highly available amino acids of plant origin. The body synthesizes the collagen beginning from its single amino acids. **Glycine, Proline, and Hydroxyproline** are the most important amino acids in the formation of the triple helix structure of collagen.

METHYLSULFONYLMETANE, SILICA, VITAMIN C AND VITAMIN E

These active ingredients have an important role in **reducing the effects of aging**. Together they promote the **formation of new collagen**. The silica is organic obtained from bamboo and is an essential nutrient that helps keep skin and hair healthy.

HYALURONIC ACID

It is a very important element for our skin as it helps maintain moisture retention in the tissues and **proper lubrication of the connective tissue**. The hyaluronic acid has always been recommended for an **anti-aging effect on skin**, face, and all skin tissues, as well as to promote the wound healing processes.

Over time, the skin loses its natural ability to regenerate. Collagen, elastin and hyaluronic acid are less and less present in the dermis and, as early as 25 years old, factors such as dehydration and thinning of the skin, which lead to the formation of the first small wrinkles, come into play. Even if ageing cannot be stopped permanently, with RE-COLLAGEN® products we can slow it down.

RE-COLLAGEN® is the evolution of a market still anchored to formulations based solely on collagen of animal origin. This vegan alternative uses the ABC COMPLEX® to encourage your body's natural production of collagen.

Ingredients: Water, Apple juice concentrate, ABC COMPLEX® (Amino Boost Collagen Complex – made of L-Glycine, L-Proline and L-Hydroxyproline), Methylsulfonylmetane MSM, Vitamin C (L-Ascorbic acid), Bamboo (Bambusa vulgaris Schrad. Ex J.C.Wendl., stem) d.e. titrated in 70% Silica, Vitamin E (Vitamin E acetate), Flavor, Citric acid, Potassium sorbate, Hyaluronic acid (Sodium hyaluronate).

How to use: Take 1 stick pack daily, preferably with breakfast, to drink as it is or diluted in a glass of water.
